Dear Parent,

The 2019–20 coronavirus outbreak is an ongoing public health emergency of international concern involving coronavirus disease 2019. It is caused by SARS-CoV-2, first identified in Wuhan, Hubei, China. As of 9 March 2020, more than 108,000 cases have been confirmed, of which 7,100 were classified as serious. 85 countries and territories have been affected, with major outbreaks in Central China, South Korea, Italy, and Iran. Though much is not known about the disease dynamics, it is evident that there is human to human transmission. As of now, there is no drug or vaccine available to manage this disease and preventive measures are very important to stop the spread of this disease.

**Don't panic, prepare & get answers to some of frequently asked questions like:**

What are the symptoms of COVID-19? How does COVID-19 spread? What can I do to protect myself and prevent the spread of disease? How likely am I to catch COVID-19? Should I worry about COVID-19?

Kindly access the following link to clarify all your doubts.
