PRINCIPALS MESSAGE

Dear Children,

The curtains for this academic year is about to fall and you all are very busy with your preparation for your final exams. Do work hard, devote more time for your studies and pray sincerely. You will succeed. All have their own strengths and all are beautiful in their own unique way. Do not get disappointed in failures. No one has won a game of chess by moving forward only. Sometimes you have to move backward also to get a better step. Always look for the good in the bad. The happy in your sad. The gain in your pain. Be grateful, never hateful.

Think Positively. The entire water of the sea cannot sink a ship, until it gets inside the ship. Similarly 'NEGATIVITY' of the world cannot put you down unless you allow it to get inside you. Never give up, try again and again you will win.

All the best,

With love
Rajesh Nair .C

The Ghost Town

One of the scariest places,
Is the Ghost Town.
With so many freaky faces,
To keep our confidence down.

The evil spirits are terrible,
The witches are so horrible.
The wolves start to howl,
Warning us that they are on the prowl.

At midnight, as the stars blend with the blue sky,
Alas! The beauty is destroyed by a little girls cry.
Following it was a wizard's scream,
As I neared, there was a blood's stream.

I went further and reached an abandoned house,
There I heard the squeaks of a mouse.
I saw a ghosts wedding,
As they were celebrating.

As the party continued, one of the witches saw me,
They caught me and as I shouted at them to make me free.
I gave out a loud scream,
And there ends my horrible dream.

The child's fancy and fear

*If I am a butterfly
I will fly around all places
After a few days I will die,
If I am a glow-worm
I will help all of you with my small light
Any how I will die soon,
If I am a rabbit
I will jump and run all over the place
A few years later I may become the food
Of any cruel - animal or man,
If I am a peacock
I will spread my feathers in the rain
You will then pluck my feathers;
What our character truly IS*

Electronic devices - A bane or a boon?

This is a question asked by millions everyday sure with the rapid development of technology and introduction of such devices in our lives have become easier, but has it also transformed us into robots with our fingers and eyes just glued on the phones. The youngsters live more in the world of electronics than the usual one.

I would not say that parents should let their children completely free with these gadgets, but putting a permanent restriction would not work either. Parents should have trust on their children. By not giving them the permission to use it, the mind of the children gets more diverted towards it. On mobiles we not only have games, Facebook, WhatsApp, Instagram etc, but also many other sources through which our knowledge can be increased to a great extent. Children between ages 13-17 can read online books, collect more information about the lesson taught in the class. But are we children ready to do that? No, none of us. As soon as we get our mobiles we start chatting with our friends, neglecting our studies which annoy our parents.

So by saying that we youngsters are correct, I am completely wrong. We should understand why our parents say so. By being active on Facebook all day long we gain nothing, and by stopping the children from not to use such apps at all parents gain nothing either we should learn how to do time-management and should give equal time to our studies and leisure activities.
